Lot, corner

A lot situated at the intersection of two or more streets, having an angle of intersection of not more than one hundred thirty-five degrees.

Lot, corridor access

See lot, flag.

Lot depth

The horizontal distance between the front and rear lot lines, measured from the midpoint of the front lot line to the midpoint of the rear lot line.

Lot, flag

A lot with access to a street by means of a corridor having less than the required lot width. The term also includes flag lot and panhandle lot. *See definition in Title 18*.

Lot, interior

A lot other than a corner lot.

Lot, key

The first lot to the rear of a reversed corner lot and not separated by an alley.

Lot, panhandle

See lot, flag.

Lot, Planned Residential Development (PRD)

A designated portion of or division of land, air space or combination thereof within the boundaries of a planned residential development that does not meet the definition of a lot. A PRD lot may be approved by the Approving Authority as part of a planned residential development permit. A PRD lot, if so approved, need not have frontage on a public street or otherwise comply with the requirements of the underlying zone, or Title 18, except as provided by this Title.

Lot, reversed corner

A corner lot, the side street line of which is substantially a continuation of the front line of the lot line of the lot to its rear.

Lot, through

A lot having frontage on two parallel or approximately parallel streets, excluding where access has been relinquished along one of the frontages.

Lot width

The horizontal distance between the side lot lines, measured at right angles to the lot depth at the building setback line for regular lots, the horizontal distance between the side lot lines measured by a straight line drawn at one-third the required minimum lot depth on each side lot line for cul-de-sac lots, knuckles lots and lots on curves, and the horizontal distance between the side lot lines measured at right angles across the mean depth of the building pad area measured between the front and rear of the building pad for corridor access lots.

Lot-line

A line defining an exterior boundary of a lot.

Lot-line, front The line separating the lot from the street. In the case of a corner

lot, a line separating the narrowest street frontage of the lot from the street, except in those cases where the latest tract deed

restrictions specify another line as the front lot line.

Lot-line, rear A lot line that is opposite and most distant from the front lot line

and, in the case of an irregular, triangular or gore-shaped lot, a line within the lot, parallel to and at a maximum distance from

the front lot line, having a length of not less than ten feet.

Lot-line, side Any boundary line not a front lot line or a rear lot line.

Wireless telecommunication facilities

A broad range of telecommunications services that enable people and devices to communicate independent of location. This includes the current technologies of cellular communications and personal communications services. This excludes noncommercial antennas, radio and television signals, and noncommercial satellite dishes. The following definitions pertain to the regulation of telecommunications uses:

- **1. Amateur Radio Station Antenna.** See "Antenna, amateur radio".
- 2. Antenna, Antenna Array, Wireless Antenna Array, or Wireless Telecommunications Antenna Array. One or more rods, poles, panels, discs, or similar devices used for the transmission or reception of radio frequency signals, that may include omni-directional antennas (whip), directional antennas (panel), and parabolic antennas (disc), but excluding any support structure as defined below.
- **3. Building-mounted.** Mounted to the side or facade of a building, or to the side of another structure such as a water tank, church steeple, freestanding sign, or similar structure, but not to include the roof of any structure.
- **4. Co-location.** The use of a common wireless antenna facility, or a common site, by two or more providers of wireless services, or by one provider of wireless services for more than one type of telecommunications technology.
- **5. FCC.** The Federal Communications Commission.
- 6. **Fixed Wireless Antenna Facility.** An un-staffed facility for the transmission or reception of wireless telecommunications services, commonly consisting of an antenna array, connection cables, a support structure to achieve the necessary elevation, and an equipment facility or subterranean vault to house accessory equipment, that may include cabinets, pedestals, shelters, and similar protective structures.
- 7. Fixed Wireless Services. Any personal wireless services as defined in the Federal Telecommunications Act of 1996, including federally licensed wireless telecommunications services consisting of cellular services, personal communications services (PCS), specialized

- **8. Ground-mounted.** Mounted to a base (e.g., pole, monopole, tower or other freestanding structure specifically constructed for the purpose of supporting an antenna or wireless communication facility) placed directly on the ground.
- **9. Mast.** A support structure that is constructed for the specific purpose of elevating a satellite earth station antenna in order to receive broadcast signals of an acceptable quality.
- **10. Monopole.** A structure composed of a single spire, pole, or tower used to support antennas or related equipment.
- **11. Roof-mounted.** Mounted above the eave line of a building.
- 12. Satellite Earth Station. A parabolic or dish-shaped antenna or other apparatus or device that is designed for the purpose of receiving or transmitting signals for voice, video, or data.
- 13. Stealth Facility. Any communication facility that is designed to blend into the surrounding environment, typically one that is architecturally integrated into a building or other concealing structure, and shall include and mean any concealed antenna.
- 14. Support Structure or Wireless Telecommunications Antenna Array Support structure. A freestanding structure that is designed and constructed for the specific purpose of supporting an antenna array and that may consist of a monopole, a mast, a self-supporting lattice tower, a guy-wire support tower, or other similar structures.
- 15. Wireless Telecommunication Antenna Facility or Wireless Telecommunications Antenna Array. An unstaffed facility for the transmission or reception of wireless telecommunications services, commonly consisting of an antenna array, connection cables, a support structure to achieve the necessary elevation, and an equipment facility or subterranean vault to house accessory equipment, that may include cabinets, pedestals, shelters, and similar protective structures.
- 16. Wireless Services or Wireless Telecommunications Services. Any personal wireless services as defined in

Worm farm The growing of earthworms for commercial or noncommercial
